OSS is the open interface to the NonStop Kernel operating system running on the HPE NonStop servers. This course focuses on advanced OSS commands and utilities, with special emphasis on those that make it possible to interoperate between the Guardian environment and the OSS environment.

Why HPE Education Services?

- IDC MarketScape leader 4 years running for IT education and training*
- Recognized by IDC for leading with global coverage, unmatched technical expertise, and targeted education consulting services*
- Key partnerships with industry leaders OpenStack®, VMware®, Linux®, Microsoft®, ITIL, PMI, CSA, and (ISC)²
- Complete continuum of training delivery options—self-paced eLearning, custom education consulting, traditional classroom, video on-demand instruction, live virtual instructor-led with hands-on lab, dedicated onsite training
- Simplified purchase option with HPE Training Credits

Audience

- UNIX® application designers and developers who are preparing to work in the OSS environment
- UNIX system administrators who will have responsibility for managing NonStop servers
- Experienced NonStop server application designers and programmers who are preparing to work in the OSS environment
- NonStop system managers with basic OSS knowledge who are interested in expanding their skills

Course objectives

- Give students a hands-on feel of Open System Services (OSS) on HPE NonStop servers, emphasizing the interoperability between the OSS and Guardian environments

Prerequisites

- OSS NonStop Server Fundamentals course (U5515S) or Concepts & Facilities course (U4147S) or equivalent experience with NonStop servers
- OSS Basic Commands/Utilities (U5516S) or working knowledge of basic UNIX commands & utilities

*Realize Technology Value with Training, IDC Infographic 2037, Sponsored by HPE, January 2016

Detailed course outline

Module 1: Introduction to Open System Services (OSS)

- What is an open system?
- OSS and Guardian comparisons
- OSS versus UNIX
- Advantages of OSS

Module 2: The OSS Shell

- Terminal requirements
- OSS shell and utilities overview
- Accessing OSS
- Configuring the OSS service
- Modifying the user environment
- Shell environment variables
- Lab exercise: Managing your OSS environment

Module 3: OSS Commands

- Editing files
- Commands and utilities
- Using pax to archive and recover files
- Compressing files
- Load balancing

Module 4: OSS File System

- File system characteristics
- Common directories
- File types
- OSS pathnames to Guardian files
- OSS filesets
- POSIX and Guardian security
- Converting OSS files to their physical file names
- Lab exercise: OSS file permissions

Module 5: OSS/Guardian Interoperability

- The osh bridge program
- The gtacl bridge program
- Accessing the /G and /E fileset extensions
- Using the OSSTTY program
- Spooling operations
- Interoperability considerations
- Lab exercises:
 - OSS to Guardian interoperability
 - Printing from OSS

Module 6: Command Scripting

- Comments and metacharacters
- Shell scripts
- Variables
- Control structures
- test command
- expr and read commands
- Arguments
- Error tracing
- Miscellaneous statements
- Arithmetic on shell variables
- let and select commands
- Functions and function management
- Lab exercise: command scripting

Onsite-Delivery Equipment Requirements

- Access to a NonStop server with OSS installed
 - OSS configured with sufficient logon IDs for students
 - Individual PCs (Windows® 95 or later) with network access and a TELNET type emulator
-

Course data sheet

Next steps

- Open System Services (OSS) Application Development and Porting course (U5518S)
