HPE Digital Learner
HPE OneView Content Pack

This content pack provides knowledge and skills related to the installation, implementation, and management of the HPE OneView suite of products. HPE OneView is an integrated converged management platform that provides software-defined intelligence across the entire HPE family of infrastructure solutions. These self-paced eLearning courses are essential training for system, network, and storage administrators using HPE OneView, and for system architects implementing HPE OneView in the data center. Hands-on practice labs in a simulated HPE OneView environment are included to help students better understand and retain HPE OneView knowledge.

Audience
This content pack is recommended for system administrators, engineers and consultants who install, manage, and monitor HPE datacenter infrastructures.

Content Pack components
This content pack consists of two courses, Installing HPE OneView and HPE OneView Administration.

Recommended learning
HPE recommends that students complete one of the following prerequisites prior to starting this content pack:

- HPE BladeSystem Administration (HE646S)
- HPE Virtual Connect (HK758S)
- Or similar experience

Content Pack objectives
After completing this course, you should be able to:

- List the main new features in HPE OneView
- Locate HPE OneView product documentation and resources
