HPE Digital Learner for HPE Alletra SMB Solutions Content Pack

The HPE Alletra storage arrays are managed and provisioned using the Data Services Cloud Console. This course teaches how to use the Data Services Cloud Console to monitor hardware, provision hosts, create volumes, and create snapshots. You enjoy access to this self-paced, web-based training as part of your HPE Digital Learner subscription service. During this time, you can repeat sections of the training for reinforcement at your own pace and on your own schedule.

**Audience**

Customer technical personnel responsible for HPE Alletra, partner field engineers, technical consultants, and support personnel responsible for HPE Alletra.

**Content Pack objectives**

After completing this course, students will be able to:

- Explain key features of the Data Services Cloud Console
- Describe Data Services Cloud Console requirements and onboarding process
- Demonstrate the main features of Data Services Cloud Console
